

Get started

Welcome 🙌

Explore our products that make it easy to build and scale data-driven applications:

 **Prisma ORM** is a next-generation Node.js and TypeScript ORM that unlocks a new level of developer experience when working with databases thanks to its intuitive data model, automated migrations, type-safety & auto-completion.

 **Prisma Optimize** helps you analyze queries, generate insights, and provides recommendations to make your database queries faster.

 **Prisma Accelerate** is a global database cache with scalable connection pooling to make your queries fast.

 **Prisma Pulse** allows you to react to database changes with type-safe model streams in real-time.

 **Prisma Postgres** is a managed PostgreSQL service that gives you an *always-on* database with *pay-as-you-go* pricing. Prisma Postgres is currently in [Early Access](#).

Prisma ORM

Add Prisma ORM to your application in a few minutes to start modeling your data, run schema migrations and query your database.

The easiest way to get started with Prisma

Explore all Prisma products at once.

Prisma Starter Template

Create a new database, model your data, run migrations, send queries and observe real-time database change events in this comprehensive 5 minute tutorial.

 Quickstart

 Examples

 Ask AI

Set up Prisma ORM from scratch with a SQLite database in 5 minutes.

Explore our ready-to-run examples with your favorite frameworks and libraries.

Choose an option to get started with your own database

Select one of these options if you want to connect Prisma ORM to your own database.

New database

Existing database

Set up Prisma ORM **from scratch** with your favorite database and learn basic workflows like data modeling, querying, and migrations.

Prisma Accelerate

Make your database queries faster by scaling your database connections and caching database results at the edge with Prisma Accelerate.

→ Get started

Add Accelerate to your app to use global database caching & connection pooling.

Examples

Explore our ready-to-run examples using Accelerate.

Speed Test

app faster.

Build your database using Prisma Pulse.

→ Get started

Add Pulse to your app to react to database changes with type-safe model subscriptions.

🔄 Examples

Explore our ready-to-run examples using Pulse.

Prisma Optimize

Make your database queries faster by using the insights and recommendations generated by Prisma Optimize.

→ Get started

Add Optimize to your app to gather useful insights and receive recommendations to improve query performance.

🔄 Examples

Explore our ready-to-run examples using Prisma Optimize.
